

ONLINE EVENT

COLOGNE AGEING SUMMER SCHOOL AUGUST 17-20, 22

Participation free of charge
Apply until June 19, 2020
www.ageing-grad-school.de

Ageing and Ageing Associated Diseases

Key Lecturers

Introduction to Ageing Research by
[Prof. Linda Partridge](#)

Learning about cell death signaling from single
molecule microscopy by [Prof. Ana García Sáez](#)

Mitochondrial dynamics in neural stem cells by
[Prof. Matteo Bergami](#)

Evolution and modulation of vertebrate lifespan by
[Dr. Dario Valenzano](#)

Genome Stability in Aging and Disease I by
[Dr. Stephanie Panier](#)

Genome Stability in Aging and Disease II by
[Prof. Björn Schumacher](#)

Journal club "The Hallmarks of Ageing"

The journal club on "The Hallmarks of Ageing" chaperoned by [Dr. Joris Deelen](#) will give you a better understanding about crucial biological processes and mechanisms underlying ageing.

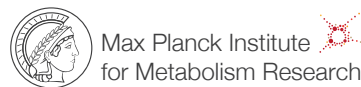

"Effective Scientific Presentation" workshop

In presentation-oriented and agile exercises our trainer [Dr. Ben Hartwig](#) teaches you how to work autonomously, goal-oriented and experience flow states. The aim is to deliver a system that helps you to present your work more effectively in the future.

Facility tour

Guided tour through core facilities
at CECAD and MPI AGE
[CECAD core facilities](#)
